*The International Bibliography on Computers and Law*

*is published twice yearly as issues of « Informatica e diritto ».*

*The other two numbers of « Informatica e diritto », Studi e ricerche, contain articles on research projects.*

---

## Materie coperte dalla Bibliografia

---

- 1) Applicazioni dell'informatica nel campo giuridico, con particolare riguardo a:
  - sistemi di documentazione,
  - processi decisionali,
  - automazione nel Parlamento, negli organi giurisdizionali, nella Pubblica Amministrazione e nelle macro-organizzazioni.
- 2) Diritto e sociologia dell'informatica.
- 3) Teoria e tecnologia dell'informazione ed elaborazione dei dati, inclusi gli aspetti formali e cibernetici, purché connessi coi punti 1) e 2).

---

## Champs couverts par la Bibliographie

---

- 1) Les applications de l'informatique à l'ensemble du droit, notamment:
  - l'informatique juridique documentaire,
  - le processus de décision,
  - l'automatisation dans le Parlement, les Cours et tribunaux, l'Administration et les grandes organisations.
- 2) Droit de l'informatique et problèmes sociologiques relatifs aux systèmes de traitement de l'information.
- 3) La théorie et les techniques de l'information et du traitement des données, ainsi que les aspects logiques et cybernétiques, sous réserve de leur rapport avec les domaines précédents.

---

## Fields covered by the Bibliography

---

- 1) Applications of the computer in the whole field of law; e.g.:
  - documentation systems,
  - decision processes,
  - automation in Parliament, the Courts, Public Administration and other macro-organizations.
- 2) Legal and sociological problems relating to information systems.
- 3) Theory and technology of information and data processing including formal and cybernetic aspects if a possible connection to 1) and 2) can be given.

---

## Erfasste Gebiete der Bibliographie

---

- 1) Anwendungen der ADV im Recht; zB:
  - Dokumentationssysteme,
  - Entscheidungsverfahren,
  - Automation der Oeffentlichen Verwaltung, der Gerichte und Parlamente sowie grosser Organisationen.
- 2) Informationsrecht und soziologische Probleme in Bezug auf Informationssysteme.
- 3) Theorie und Technologie der Information und Datenverarbeitung einschliesslich formaler und kybernetischer Aspekte, wenn eine Verbindung zu 1) und 2) denkbar ist.

311 Author Index

# **INTRODUCTION**

## **Aims of the International Bibliography**

The present issue contains a computerized and phototypeset International Bibliography on Computers and Law, the main purpose of which is to give an up-to-date reference aid on legal informatics to a wide range of users at national and international level. In order to encourage and develop international communication and improve harmonization and unity within the Bibliography, English has been chosen as the main documentation language and English rules have been followed in the citation of bibliographical references, even though the Bibliography is published as an issue of an Italian journal and the data has been compiled mostly by national centers. The International Bibliography on Computers and Law is a keyword-out-of-context (KWOC) index divided into three main parts: a keyword index, the bibliography itself, and an author index.

## **How to use the Kwoc Index**

Words which arouse the particular interest of the reader may be found in the alphabetic keyword listing. When a given word is located, a glance underneath will reveal its relationship to the titles. Access to complete bibliographic information may be gained by matching each alphanumeric code printed under the keyword entry with the identical code appearing in progressive order in the Bibliography.

The names of all authors and the alphanumeric code of their works are listed in the Author Index. Access to the Bibliography may also be made through the Author Index.

## **Keyword Index**

This is an automated list of relevant words or combinations of words which serve as descriptors of the contents of retrieved documents and which are listed in alphabetical order on the left-hand side of each page. These keywords are taken from the untranslated titles of English language publications, from the English translation of foreign language titles, from the English abstract of individual documents and from editorial insertions aimed at enlarging retrieval possibilities. For this purpose some connections between keywords of similar meaning have been indicated by the editorial staff.

The titles pertaining to each keyword — completed with their English translation and alphanumeric code on the left which identifies the entry and refers the user to the Bibliography itself — appear automatically under the keyword.

A typical entry in the Keyword Index follows:

## **UNESCO**

Das UNESCO-Projekt UNISIST. (The UNESCO Project UNISIST).	218	0284M
Tesauto: antico termine per uno strumento moderno della documentazione. (Thesaurus: an Ancient Word for a Modern Documentation Instrument).	23213	0409P
WISI: UNESCO/IBI-ICC Project. Preliminary Report on a World Information System on Informatics.	228	0698O
World Information System on Informatics (WISI).	235	0694O

## **Bibliography**

This is the main index: it contains complete bibliographical details of each analyzed entry and a short description of its content added in English by the editorial staff. The documents are ordered according to an alphanumeric code which refers the user from the Keyword or Author Index back to the Bibliography for full information.

A typical entry in the Bibliography follows:

### **24544 Computer programme protection**

**0245P** Robert G.

La protection juridique des programmes d'ordinateurs.

(Legal Protection of Computer Programs).

Gazette des Tribunaux du Midi, 1975, April 19, n° 6378, p. 1.

Legal protection of computer programs in France and in the United States in 1975. Copyright and trade mark right. A discussion on patentability of software.

The code consists of two parts. The first part arranges individual entries according to a Decimal Classification Table printed at the front of the Bibliography. The classification table, elaborated by the editorial staff, reveals document content using a 6-figure code corresponding to the six specification levels of the table. The first part of the code is on top of all documents pertaining to it and is completed with relative headings as contained in the classification table. The second part of the code refers to each single entry and precedes the author name. It consists of a 4-figure number representing the serial number of entries analyzed. A letter code follows, representing the nature of the analyzed entry:

L = Book; M = Miscellaneous; O = A booklet with less than 100 pages; P = Items derived from periodicals.

## **Author Index**

This section lists all authors or editors (followed by «ed.») included in the index, along with the alphanumeric code that refers to entries in the Bibliography. It is arranged automatically in alphabetical order.

The authorship of anonymous entries is attributed to the journal in which they appear: in this case the name of the journal is given followed by «ed.».

A typical entry in the Author Index follows:

### **Zindler Hans-Joachim**

EDV im statistischen Bundesamt. Teil 1: Datenverarbeitung und Programmierprobleme in der amtlichen Statistik. (EDP in the Federal Statistic Office. Part. 1: Data Processing and Problems of Programming in the Official Statistic).	21923	0765P
EDV im statistischen Bundesamt. Teil 2: Entwicklung statistikbezogener Software. (EDP in the Federal Statistic Office. Part 2: Development of a Statistic Related Software).	21923	0766P
